WORKFORCE MANAGEMENT & LIVE OPERATIONS LEADERSHIP

Intraday Queue Management	Real-Time Staffing	Service Level Recovery	Volume Monitoring	Queue Performance	Workforce Coordination
100%	24/7	30%	0		
SLA Adherence	Live Operations Leadership	Process Efficiency Gain	Unresolved Escalations		

PROFESSIONAL SUMMARY

High-accountability operations leader with 8+ years of experience managing live operations, queue stability, and Service Level Agreements (SLAs) in fast-paced, high-volume environments. Proven track record leading operations teams, managing intraday operations, queue performance analysis, and making real-time staffing decisions to protect service levels. Highly skilled in building scalable queue management frameworks, evolving operational playbooks, and executing service level recovery plans during volume spikes. Technical proficiency in Google Sheets for forensic investigations, workflow automation, and operational modeling. Exceptional analytical capabilities combined with strong written communication skills to synthesize complex operational issues into clear, executive-level narratives. Passionate about coaching teams to become highly autonomous operators, applying first-principles thinking to SOPs, and partnering cross-functionally with Workforce Management, Vendor Management, and Leadership to drive organizational alignment.

CORE COMPETENCIES

Intraday Queue Management	Real-Time Staffing Decisions	Service Level Recovery
Queue Performance Monitoring	Workforce Coordination	Capacity Planning Support
Volume Monitoring & Analysis	Incident Management & Root Cause Analysis	Advanced Google Sheets & Modeling

PROFESSIONAL EXPERIENCE

Rippling | Operations Lead (Technical & Live Support) Jan 2022 – Feb 2026 | Bangalore, India (Remote)

AI-powered SaaS platform supporting 1M+ businesses — owning live support operations, intraday queue management, and SLA adherence across a distributed global team.

- Owned the end-to-end daily operations of the live support function, continuously monitoring queue stability and ensuring 100% SLA adherence across multiple critical lines of business.
- Monitored real-time queue health, volume spikes, backlog growth, and agent availability to drive immediate staffing and prioritization decisions during operational surges.
- Coordinated directly with Workforce Management and Operations teams to rebalance staffing coverage and execute service level recovery plans during critical incidents and unexpected queue fluctuations.

- Acted as the primary point of contact during live service disruptions, driving rapid root cause analysis, leading forensic investigations, and directing operational decision-making to mitigate business impact.
- Led and developed a team of operators, establishing high-performance standards and coaching individuals toward autonomy, resulting in a highly autonomous team capable of independent problem-solving.
- Built scalable queue management frameworks and evolved operational playbooks, significantly reducing the team's dependency on tribal knowledge and streamlining onboarding for new analysts.
- Maintained deep technical proficiency in advanced Google Sheets, utilizing pivot tables, macros, and complex formulas to build operational models and automate daily workflow reporting.
- Continuously evaluated existing SOPs and escalation workflows using first-principles thinking, successfully driving a 30% improvement in process efficiency.
- Partnered cross-functionally with Engineering, Product, and Leadership teams, providing concise, executive-level operational narratives regarding incident risks and recommended actions.

Tide (SME Banking Fintech) | Senior Operations Associate Jun 2019 – Dec 2022 | Hyderabad, India

Fast-growing global fintech platform — managing high-volume operations and service escalations.

- Managed high-volume, real-time ticket queues and operations, demonstrating strong operational judgment to remain calm and decisive during high-pressure incidents in a regulated environment.
- Supported intraday operational adjustments based on ticket inflow trends, SLA risk indicators, and queue backlog analysis to protect service levels.
- Proactively identified operational bottlenecks and mitigated risks before they required leadership escalation, functioning as a high-accountability operator.
- Synthesized complex operational data into clear, written executive summaries, providing visibility into workforce performance and platform health.
- Collaborated with Vendor Management and internal support teams to drive alignment on SLA targets and operational execution strategies.

VOIS (Vodafone) | Operations Associate Apr 2018 – May 2019 | Kolkata, India

- Supported daily live operations by monitoring queue volumes, managing ticket distribution, and ensuring strict adherence to internal SLAs.
- Assisted in the creation and refinement of operational SOPs, transitioning undocumented processes into standardized, scalable workflows.

Amazon Development Center | Operations Specialist Jan 2016 – Mar 2018 | Kolkata, India

- Conducted queue analysis and operational modeling in a high-volume, global operational environment.
- Utilized advanced data tracking to investigate operational anomalies, feeding insights back to workforce management to improve shift coverage and response times.

TECHNICAL SKILLS & TOOLS

Live Operations	Intraday Monitoring, Real-Time Staffing Decisions, Queue Performance Analysis, Service Level Recovery, Queue Forecasting Support, Incident Response
Workforce Management	Workforce Coordination, Capacity & Coverage Analysis, Service Level Management, SLA Protection, Backlog Analysis
Leadership & Strategy	Team Development, Coaching Autonomous Operators, Playbook Creation, SOP Optimization, Executive Narrative Writing
Data & Tooling	Advanced Google Sheets (Modeling, Automation), KPI Reporting, Zendesk, Jira, Workflow Automation
Soft Skills	High Accountability, Decisive under Pressure, First-Principles Thinking, Cross-Functional Alignment
Languages	English (Excellent Written & Verbal) Hindi (Fluent) Bengali (Fluent)

EDUCATION & CERTIFICATIONS

B.Tech – Electronics & Communication Engineering | Himalayan University | 2016

Lean Six Sigma Green Belt (Process Improvement) • ITIL Foundation v4 (Service Management) • CompTIA Network+
