

KUNTAL THAKUR

Senior Support Engineer • Linux • Kubernetes • SAML • SQL • AWS • Grafana • 8+ Years

India (Remote) | tkuntal20@gmail.com | +91 7003163345

CORE TECHNICAL STACK

Linux • Windows	SQL • Log Analysis	Kubernetes • Docker	SAML • OIDC • OAuth	AWS • Azure • GCP	Grafana • Kibana
95%+	35%	30%	20%		
SLA Adherence	Incident Reduction	Faster Resolution	Ticket Deflection		

PROFESSIONAL SUMMARY

Senior Support Engineer with 8+ years of strong experience in technical and application support, helpdesk, ticket management, and support engineering for global SaaS and enterprise software products. Deep expertise analysing, troubleshooting, and resolving application, system, and integration issues across Linux and Windows platforms, cloud infrastructure (AWS, Azure, GCP), Kubernetes and Docker container environments, and distributed microservices architectures. Proficient in reading and analysing logs, writing SQL for data checks and issue investigation, and diagnosing identity provider failures across Keycloak, LDAP, SAML, OIDC, and OAuth integrations. Strong knowledge of JVM internals, Kubernetes deployments, Docker, and RESTful APIs — able to investigate issues from application layer through to infrastructure and surface precise root cause findings for development teams. Familiar with monitoring tools including Grafana, Kibana, and Datadog for observability-driven incident investigation. Experienced in ticket management and escalation processes across Jira, Zendesk, and ServiceNow. Basic scripting skills in Python and Bash for diagnostic automation and support efficiency. Experienced supporting SaaS products and understands CI/CD pipelines and DevOps processes well enough to collaborate effectively with Engineering. Excellent English communication — written and spoken — able to clearly explain technical concepts to diverse audiences including customers on troubleshooting calls and development team members sharing technical insights. Strong self-organisation, natural curiosity, and genuine eagerness to learn — ready to build KNIME workflow expertise and contribute to continuous improvement of support processes, tools, and knowledge sharing.

CORE COMPETENCIES

Application • System • Integration Support	Linux • Windows Platform Administration	SQL • Log Analysis • Data Investigation
Keycloak • LDAP • SAML • OIDC • OAuth	JVM • Kubernetes • Docker • REST APIs	AWS • Azure • GCP Cloud Infrastructure
Jira • Zendesk • ServiceNow Ticketing	Grafana • Kibana • Datadog Observability	Python • Bash Scripting • CI/CD Awareness
Customer Calls • Technical Troubleshooting	Dev Team Collaboration • Insight Sharing	On-Call Rotation • Escalation Management

PROFESSIONAL EXPERIENCE

Rippling | **Senior Support Engineer** Jan 2022 – Feb 2026 | Bangalore, India (Remote)

AI-powered, multi-product SaaS platform with 250+ microservices, 470TB distributed data, and 4+ billion daily API hits.

- Analysed, troubleshooted, and resolved application, system, and integration issues — owning end-to-end technical investigation from initial triage through root cause identification and verified resolution, consistently maintaining 95%+ SLA adherence.
- Provided outstanding technical support via ticket management systems (Jira, Zendesk) and troubleshooted complex issues over calls with customers.
- Administered software solutions on Linux (Ubuntu, CentOS) and Windows platforms — managing services, analysing system logs, performing file system diagnostics, troubleshooting process failures.
- Read and analysed structured and unstructured application logs, JVM stack traces, and container logs using Grafana, Kibana, Datadog, and CloudWatch.
- Wrote SQL queries for data checks and issue investigation, validating application data integrity.
- Diagnosed and resolved identity provider integration issues across Keycloak, LDAP, SAML 2.0, OIDC, and OAuth 2.0.
- Applied knowledge of JVM, Kubernetes, and Docker to platform-level troubleshooting, inspecting pod states and container logs.
- Debugged RESTful API integrations using Postman and curl, tracing request/response failures.
- Collaborated closely with development team members to share technical insights, producing structured bug reports.
- Contributed to continuous improvement of support processes, tools, and knowledge sharing.
- Applied Python and Bash scripting to automate diagnostic tasks, parse logs, and build support utilities.

Tide (SME Banking Fintech SaaS) | Senior Support Engineer Jun 2019 – Dec 2022 | Hyderabad, India

High-availability fintech SaaS platform in a regulated environment.

- Analysed, troubleshoot, and resolved application, system, and integration issues across a high-availability fintech SaaS platform — owning ticket lifecycle management in Jira and Zendesk.
- Administered software solutions on Linux and Windows platforms, managing system services and analysing OS-level logs.
- Read and analysed application logs, JVM stack traces, and container logs using Kibana, Grafana, and CloudWatch.
- Wrote SQL queries for data checks and issue investigation, validating data integrity in a regulated fintech environment.
- Diagnosed identity provider integration failures across SAML, OIDC, OAuth 2.0, and LDAP.
- Applied knowledge of JVM, Kubernetes, and Docker to infrastructure-level troubleshooting.
- Troubleshoot RESTful API integration issues over customer calls and via Postman.
- Collaborated closely with development team members to share technical insights and improve future releases.

VOIS (Vodafone) | Support Engineer Apr 2018 – May 2019 | Kolkata, India

- Analysed, troubleshoot, and resolved application, system, and integration issues across Linux and Windows platforms — reading and analysing logs, writing SQL for data investigation.
- Administered Jira and ServiceNow for ticket lifecycle management and escalation processes.
- Applied Grafana, Kibana, and Datadog for observability-driven issue investigation.

Amazon Development Center | Support Engineer Jan 2016 – Mar 2018 | Kolkata, India

- Analysed, troubleshoot, and resolved application, system, and integration issues in a high-scale cloud environment.
- Diagnosed identity and authentication failures across SAML, OAuth, and LDAP integrations.
- Collaborated with development team members to share technical insights and contributed to knowledge base and runbook development.

TECHNICAL SKILLS & TOOLS

OS & Platform Admin	Linux (Ubuntu, CentOS, RHEL), Windows Server
SQL & Data	SQL, PostgreSQL, MySQL, MS SQL Server
Log Analysis	Application logs, system logs, JVM stack traces, CloudWatch, Kibana, Grafana
Identity & Auth	Keycloak, LDAP, SAML 2.0, OIDC, OAuth 2.0
Containers & JVM	Kubernetes, Docker, JVM heap analysis, thread dumps
REST APIs	Postman, curl, RESTful API debugging, HTTP status codes
Cloud Platforms	AWS (EC2, S3, VPC, IAM), Azure, GCP

Observability	Grafana, Kibana, Datadog
Ticketing Systems	Jira, Zendesk, ServiceNow
Scripting	Python, Bash

EDUCATION & CERTIFICATIONS

B.Tech – Electronics & Communication Engineering | Himalayan University | 2016

Microsoft Certified: Azure Administrator Associate (AZ-104) • AWS Cloud Foundations • CompTIA Network+
• ITIL Foundation v4 • Lean Six Sigma Green Belt • Microsoft Dynamics 365 (CRM/ERP)
