ENTERPRISE AUTOMATION, IAM & SAAS INTEGRATIONS

REST APIs & Webhooks	IAM & RBAC	SaaS Automation	User Provisioning
Google Workspace	Slack & HRMS Integrations	OAuth & SAML	Event-Driven Workflows
4B+ API Ecosystem Exposure	99.9% Workflow Reliability	40% Faster Provisioning	35% Reduction in Manual Operations

PROFESSIONAL SUMMARY

Results-driven IT Automation and Integration Engineer with 8+ years of experience building and supporting enterprise SaaS integrations, workflow automation, identity lifecycle management, and API-driven operational systems across high-scale SaaS and fintech environments. Strong experience designing and managing REST API integrations, webhook-based workflows, RBAC provisioning systems, onboarding/offboarding automation, and secure authentication workflows using OAuth 2.0, SAML, API keys, and token-based authentication.

Hands-on experience integrating and supporting platforms including Google Workspace, Slack, HRMS systems, Jira, ServiceNow, Darwinbox, Okta, Azure AD, and collaboration tools within distributed enterprise environments. Skilled in automation scripting, middleware workflow

orchestration, event-driven integrations, access governance, entitlement mapping, and reconciliation workflows across HRMS, IAM, and operational systems.

Strong understanding of ITGC controls, audit compliance, access governance, SaaS infrastructure, and operational security workflows. Experienced collaborating with Security, Compliance, Engineering, and IT Operations teams to deliver scalable and secure automation systems in high-growth SaaS organizations.

CORE COMPETENCIES

- REST API Integrations
 - Webhooks & Event-Driven Automation
 - IAM & RBAC Workflows
 - User Provisioning & Deprovisioning
 - SaaS Automation Engineering
 - OAuth 2.0, SAML & API Authentication
 - Google Workspace Administration
 - Darwinbox HRMS Integrations
 - Slack & Collaboration Tool Integrations
 - Access Governance & ITGC Controls
 - Identity Lifecycle Management
 - Workflow Automation & Middleware Logic
 - ITSM Integrations (ServiceNow, Jira)
 - Data Validation & Reconciliation
 - Python Automation Scripting
 - API Testing with Postman
 - Okta & Azure AD
 - Zapier & Workflow Automation
 - Documentation & SOP Management
-

PROFESSIONAL EXPERIENCE

Rippling | Senior IT Automation & Integration Engineer

Jan 2022 – Feb 2026 | Bangalore, India (Remote)

Global SaaS platform supporting large-scale HR, payroll, onboarding, and workforce automation systems.

- Designed and supported REST API integrations and webhook-driven workflows between HR, identity, payroll, and collaboration platforms.
- Automated onboarding, offboarding, access provisioning, and entitlement mapping workflows across SaaS systems including Google Workspace, Slack, Darwinbox HRMS, and internal operational platforms.
- Developed secure authentication and integration workflows using OAuth 2.0, SAML, API tokens, RBAC models, and identity governance principles.
- Integrated enterprise operational workflows with ITSM systems including Jira and ServiceNow for automated request, approval, escalation, and provisioning processes.
- Performed data reconciliation and validation across HRMS, IAM, and operational systems to ensure provisioning accuracy and audit readiness.
- Worked extensively with APIs, JSON payloads, Postman, operational logs, and webhook event troubleshooting to resolve workflow failures and synchronization issues.
- Collaborated with Security, Compliance, and IT Operations teams to support ITGC controls, audit requirements, access governance reviews, and deprovisioning workflows.
- Built scalable workflow documentation, automation playbooks, integration architecture diagrams, and operational SOPs for internal teams.
- Supported event-driven integrations enabling real-time updates between HR systems, identity platforms, and operational tooling.

Impact

- Reduced manual onboarding and provisioning effort by 40% through automation workflows and API integrations.
- Improved access governance visibility and provisioning accuracy across distributed SaaS systems.
- Reduced operational delays and repeat provisioning incidents through workflow automation and reconciliation controls.

Tide | IT Automation & SaaS Operations Specialist

Jun 2019 – Dec 2022 | Hyderabad, India

Fast-growing fintech platform supporting operational automation and identity workflows across distributed SaaS environments.

- Managed API-based integrations and operational automation workflows across onboarding, user lifecycle management, access controls, and SaaS operations.

- Worked with REST APIs, webhook events, operational tooling, and backend workflows to troubleshoot synchronization and authentication issues.
- Supported identity and access management workflows including MFA, SSO, Azure AD, RBAC policies, and user provisioning controls.
- Automated operational workflows using Zapier, scripting logic, and workflow orchestration tools to reduce manual intervention.
- Integrated and supported collaboration tools, ticketing systems, and cloud operational platforms across business operations teams.
- Assisted with audit preparation, ITGC documentation, entitlement reviews, and operational access governance reporting.
- Maintained workflow documentation, SOPs, integration diagrams, and troubleshooting playbooks.

Impact

- Improved operational efficiency by automating repetitive onboarding and access management tasks.
 - Reduced provisioning inconsistencies and access-related operational escalations.
 - Improved cross-system synchronization reliability across operational SaaS platforms.
-

VOIS (Vodafone) | Systems Integration & IT Operations Associate

Apr 2018 – May 2019 | Pune, India

- Supported enterprise operational systems, identity workflows, and access management operations.
- Assisted with user provisioning, operational troubleshooting, access validation, and ticket-based workflow coordination.
- Worked with operational dashboards, system logs, and backend tooling to investigate workflow issues.
- Coordinated with infrastructure and operations teams during system-impacting incidents.

Impact

- Improved operational tracking and issue-resolution visibility across support and access management workflows.
-

Amazon Development Center | Operations & Technical Support Associate

Jan 2016 – Mar 2018 | Kolkata, India

- Supported operational systems, workflow automation initiatives, and technical operations in high-volume enterprise environments.
- Assisted with process automation, operational reporting, and system troubleshooting workflows.
- Investigated operational discrepancies and escalated critical incidents impacting system operations.

Impact

- Helped improve operational efficiency and workflow consistency through process optimization initiatives.
-

TECHNICAL SKILLS & TOOLS

Integration & Automation

REST APIs, Webhooks, Middleware Integrations, Event-Driven Architecture, Workflow Automation, Postman, JSON, OAuth 2.0, SAML, API Tokens

IAM & Identity Platforms

Okta, Tuleba, Azure AD, RBAC, MFA, SSO, Identity Lifecycle Management, Access Governance, Entitlement Mapping, User Provisioning & Deprovisioning

SaaS & Enterprise Platforms

Google Workspace, Darwinbox HRMS, Slack, Jira, ServiceNow, Confluence, ITSM Platforms, Collaboration Tools

Automation & Scripting

Python, Zapier, Workflow Automation Logic, Operational Scripting, API Testing, Data Validation & Reconciliation

Compliance & Governance

ITGC Controls, Audit Readiness, Access Reviews, Security Policies, Provisioning Controls, Operational Compliance

Reporting & Documentation

Google Sheets, Excel, SOP Documentation, Workflow Diagrams, Integration Documentation, Operational Reporting

EDUCATION & CERTIFICATIONS

B.Tech – Electronics & Communication Engineering
Himalayan University | 2016

Certifications:

- ITIL Foundation v4
- Lean Six Sigma Green Belt
- Microsoft Azure Administrator Associate
- AWS Cloud Foundations
- CompTIA Network+
- Google Workspace Administration Fundamentals
